

Informed Solutions for Better Health

The GEB Network takes a holistic approach to support the health and wellbeing of clients all around the world.

Through ongoing data collection and analysis, GEB provides insight into the claims experience of our clients. We support both Network Partners and Global Clients in considering relevant, population-specific initiatives to help mitigate trends and cost drivers. We focus on programmes that can best help clients to support the health of their global staff, as well as the overall financial health of their benefit programmes. We do this through programmes that help members Stay Healthy, Return to Health and Manage Chronic Illness. These are GEB's three healthcare missions:

Stay Healthy

Primary prevention programmes focused on helping members monitor and track their health such as onsite health screenings, vaccinations, and general education to support behavioral change.

Return to Health

Complex intervention programmes focused on helping members manage sudden or emerging illness. Programmes may include Medical Second Opinion, access to 24X7 clinical support, and complex case management.

Manage Chronic Illness

Personalised support programmes for members dealing with chronic illness or conditions. Support may include access to clinical staff, lifestyle change and behavioral support, and health education / training.

These programmes work in concert with the Health, Life, Critical Illness and Disability benefits offered by our Network Partners to support employees and their dependants at every stage of health.

The following pages provide a current picture of the health and wellbeing initiatives offered through our Network Partners all around the world.
